# Occupational Health Regional Partnership

Health Assured has established itself as a distinctive and specialist psychological services provider, currently supporting over seven million lives in the United Kingdom and the Republic of Ireland through direct relationships and channel partnerships. We can, also, extend this support to overseas employees through an international partnership arrangement.

We believe the delivery of health services are rapidly changing and we would like to partner with the best-in-class occupational health providers to bring together our market-leading health and wellbeing capabilities. We have a wealth of experience with some of the largest providers which has helped us develop highly effective case referral pathways and, through raising awareness of mental wellbeing and developing this collaborative support, we deliver in partnership a holistic intervention and supportive approach.

**77%** of employees have experienced symptoms of poor mental health at some point in their lives

**29%** of employees have been diagnosed with a mental health condition

**62%** of employees attributed their symptoms of poor mental health to work or said that work was a contributing factor

**49%** of line managers would appreciate basic training in common mental health conditions

**30%** of employees think their employer doesn't support people well who experience mental health problems, and 30% don't know either way

'Mental Health at Work Report 2016' by Business in the Community
